1. Executive Summary

This report presents a comprehensive **On-Page SEO & Semantic Optimization** strategy for a **Medical Clinic** website. The focus is on establishing **E-E-A-T** (Experience, Expertise, Authoritativeness, and Trustworthiness) to ensure AI crawlers and search engines confidently reference the clinic's content.

Key Findings:

- Yoast SEO Score: 52/100 (Needs Improvement)
- Screaming Frog Issues: 18 broken links, 34 missing meta descriptions
- Surfer SEO Content Score: 40/100 (Target: 80+)
- EEAT Score: 35/100 (Critical for Medical/YMYL)
- Schema Markup: Not implemented (Critical)

2. Objectives

#	Objective	Target	Status
1	Complete technical SEO audit	All issues identified	Completed
2	Optimize landing pages for target keywords	All pages optimized	Completed
3	Structure blog content for SEO	Template created	Completed
4	Implement medical schemas	5 schema types	Completed
5	Establish E-E-A-T signals	Full EEAT plan	Completed
6	Conduct semantic keyword research	100+ LSI keywords	Completed
7	Create AI search optimization strategy	GEO recommendations	Completed

3. Website Audit

Audit Overview

Metric	Value	Assessment
Total Pages	87	—
Indexable Pages	62 (71%)	Needs improvement
Broken Links	18	Critical
Missing Meta Descriptions	34 pages	Critical
Missing H1 Tags	8 pages	Critical
Duplicate Content	12 pages	Critical
Slow Pages	23 pages	High

Page-by-Page Audit

Page	Title Tag	Meta Desc	H1	Schema
Homepage	Too short	Missing	Generic	None
Services	No keywords	Missing	Missing	None
Doctors	No credentials	Missing	Weak	None
Blog	Inconsistent	Missing	Missing	None
Contact	Acceptable	Missing	OK	None

4. Screaming Frog Technical Audit

Crawl Summary

Metric	Value
Total URLs Crawled	87
2xx Responses	62
3xx Redirects	7
4xx Errors	18
Average Page Depth	4.2

Broken Links

URL	Hits	Fix
/blog/old-article-1	8	301 redirect
/images/team-photo.jpg	5	Update path
/services/removed-service	12	301 to /services/
/old-location	3	301 to /contact/

Missing Elements

Element	Pages Missing	Impact
Title Tag	3	High
Meta Description	34	High
H1 Tag	8	High
H2 Tags	23	Medium
Image Alt Text	45	Medium
Canonical Tag	12	High

5. Yoast SEO Optimization

Current Yoast Scores

Page	SEO Score	Readability
Homepage	58/100 	65/100 
Services	45/100 	55/100 
Doctors	52/100 	60/100 
Blog (Avg)	48/100 	58/100 
Overall	52/100	62/100

Yoast Fixes Summary

Check	Current	Fix
Focus keyword in title	No	Add to all titles
Focus keyword in meta	No	Add to all metas
Focus keyword in H1	No	Include in H1
Content length	370 words avg	1,500+ words
Internal links	2 per page	5+ per page
Schema	Not set	Enable all schemas

6. Surfer SEO Recommendations

Content Scores

Page	Current	Target	Word Count
Homepage	42/100	80+	350 → 1,500
Services	38/100	80+	150 → 2,000
Doctors	45/100	80+	400 → 1,800
Blog	35/100	80+	450 → 2,000

NLP Terms to Add

Term	Recommended Usage	Current
primary care	5-8 times	1
board-certified	3-5 times	0
preventive care	3-5 times	0
patient-centered	2-4 times	0
medical expertise	3-5 times	1

7. Landing Page Optimization

Homepage Optimization

Element	Current	Recommended
Title Tag	"Medical Clinic Home"	"Best Medical Clinic in [City] Primary Care [Clinic]"
Meta Description	Missing	"Trusted medical clinic in [City]. Board-certified doctors. Book today."
H1	"Welcome"	"Trusted Medical Clinic in [City] — Compassionate Care"

Heading Structure

Level	Content	Keyword
H1	Trusted Medical Clinic in [City]	Primary keyword
H2	Our Medical Services	Service keywords
H2	Why Choose [Clinic Name]?	Trust keywords
H2	Meet Our Doctors	Expertise keywords
H2	Patient Reviews	Social proof
H2	FAQs	Question keywords

8. Blog Optimization

Blog Content Template

Element	Specification
Title	[Primary Keyword] — [Secondary Keyword] [Clinic]
Word Count	1,500-2,500 words
Internal Links	3-5 per post
External Links	2-3 medical authorities
Images	3-5 with alt text
FAQs	3-5 questions per post
Author	Named physician with credentials
Reviewer	Medically reviewed by licensed MD

Recommended Blog Topics

Title	Keywords	Words
Complete Guide to Annual Health Checkups	annual health checkup, preventive care	2,000
Urgent Care vs. Emergency Room: When to Go Where	urgent care vs emergency	1,800
Managing Diabetes: A Patient's Guide	diabetes management	2,200
Women's Health: Essential Screenings by Age	women's health screening	2,000

9. Schema Markup Implementation

Required Schemas

Schema Type	Purpose	Priority
MedicalClinic	Identify clinic	Critical
Physician	Identify doctors	Critical
FAQPage	Answer questions	Critical
Review	Patient testimonials	High
Article	Blog content	High
LocalBusiness	Local SEO	Critical
BreadcrumbList	Navigation	Medium

Schema Implementation Example

Field	Example
@type	MedicalClinic
name	[Clinic Name]
telephone	+1-555-123-4567
address	123 Medical Drive, City, State ZIP
openingHours	Mo-Fr 08:00-18:00
medicalSpecialty	Primary Care, Internal Medicine
aggregateRating	4.8/5 (156 reviews)

10. E-E-A-T Optimization

Current EEAT Assessment

Signal	Current	Target	Status
Experience	25/100	80/100	Critical
Expertise	40/100	85/100	High
Authoritativeness	35/100	80/100	High
Trustworthiness	40/100	85/100	High
Overall	35/100	82/100	Critical

EEAT Implementation Plan

Signal	Action	Priority
Experience	Add 5+ patient case studies	High
Expertise	Display all doctor credentials	High
Authoritativeness	Show medical association memberships	High
Trustworthiness	Add reviews, accreditations, HIPAA badge	High

Doctor Bio Requirements

Element	Required
Full Name + Credentials	Dr. [Name], MD, FACP
Specialty	Board-Certified [Specialty]
Education	Medical School, Residency
Board Certifications	[Board Name], [Year]
Years of Experience	[X]+ years
Professional Affiliations	AMA, ACP, etc.
Languages	English, [Other]

11. Semantic Keyword Research

Primary Keywords

Keyword	Volume	Difficulty
medical clinic near me	49,500	68
doctor near me	90,500	72
primary care physician	33,100	58
walk-in clinic [city]	12,100	45
family doctor	22,200	55

LSI Keywords

Keyword	Category	Volume
preventive health checkup	Service	4,400
chronic disease management	Service	3,600
pediatrician near me	Local	14,800
blood test near me	Local	22,200
telemedicine consultation	Service	12,100

Content Gap Analysis

Topic	Competitors	Client	Gap
Preventive Care Guide	15 articles	0	Critical
Chronic Disease Management	12 articles	2	High
Women's Health	10 articles	1	High
Pediatric Care	8 articles	0	High

12. AI Search Optimization

GEO Strategy for Medical Content

Strategy	Implementation	Priority
Clear Definitions	Define all medical terms in content	Critical
Data Tables	Symptoms, treatments in structured format	High
FAQ Sections	5-10 questions per service page	Critical
Expert Quotes	Doctor insights in content	High
Medical Citations	Reference Mayo Clinic, WHO, etc.	High
Schema Markup	MedicalClinic, Physician, FAQ schemas	Critical

13. Implementation Roadmap

8	Generated Surfer SEO recommendations increasing content scores from 40 to target 80+	Surfer SEO, Content

16. Interview Questions & Answers

#	Question	Answer
1	What is E-E-A-T and why is it important for medical websites?	E-E-A-T = Experience, Expertise, Authoritativeness, Trustworthiness. Medical content is YMYL (Your Money or Your Life) — Google applies highest scrutiny. Strong EEAT ensures rankings and AI citations.
2	What schemas are important for medical websites?	MedicalClinic, Physician, FAQPage, Review, LocalBusiness, Article. These help search engines understand medical content and display rich results.
3	How do you optimize content for medical SEO?	Use target keywords naturally, structure with H1/H2/H3, add medical NLP terms, cite medical authorities, include FAQ sections, display doctor credentials, and maintain content freshness.
4	What tools do you use for medical SEO?	Screaming Frog (technical audit), Yoast SEO (on-page), Surfer SEO (content optimization), Google Search Console (performance), Schema Markup Validator (schemas).
5	How do you establish trust for medical websites?	Display doctor credentials, show patient reviews, add accreditations, implement HIPAA compliance, provide transparent pricing, and cite medical authorities.
6	What is the difference between medical SEO and regular SEO?	Medical SEO has higher YMYL standards, requires EEAT signals, needs medical schemas, must cite authoritative sources, and faces stricter content scrutiny.
7	How do you optimize for AI search in healthcare?	Create structured content with clear definitions, data tables, FAQ sections, expert quotes, medical citations, and comprehensive schema markup.
8	How do you handle medical content guidelines?	All content reviewed by licensed physicians, cite medical authorities (Mayo Clinic, WHO), display author credentials, show last updated dates, and never make unsupported claims.
